

Huth – Pack 10

PFFE – impregnated high grade Ramic Yarn Packing

Description: Braided packing, composed of very high quality hemp yarns, impregnated wire with pure PTFE, deeply lubricated with special lubricant. It is built with the “diagotrex” system.

Recommended applications: Considering its long duration, it’s suitable, for a specific employment in the naval field; it is employed on pumps and valves for fresh water, sea water, pickle, hydrocarbons, tail shafts and hydraulic applications in general. This packing is highly resistant to mechanical stress and is well suited for service as pump packing for neutral and abrasive media which contain crystalline or fibrous contamination.

Technical dates:

| pH | Temperature | P (kg/cm ²) | V (m/sec) | friction |
|------|-------------|-------------------------|-----------|----------|
| | 20°C | 15 | 10 | * |
| 4-14 | to | 10 | 5 | * |
| | 120°C | 60 | 2 | * |
